# BENEFITS OF MICRODERMABRASION

## The best your skin can get

Almost everyone faces skin problems in his or her life. There are a number of treatments available for the skin problems like *Acne*, enlarged skin pores etc. but these problems may or may not get properly fixed by them, therefore, a very effective and inexpensive way called Microdermabrasion has been developed for treating skin disorders like *acne* blemishes, enlarged and clogged pores, blackheads and whiteheads. Additionally, this treatment helps to fight with signs of aging and fights hyper pigmentation. *Microdermabrasion* provides the best benefits to your skin. The major *benefit of Microdermabrasion* is that it is better than normal laser treatments. It is non surgical, so your skin does not mutilated. Another *benefit of [Microdermabrasion](#)* is that, it's a long term solution to improve the complexion and texture of your skin.

Microdermabrasion is known in Europe for being a quick and effective treatment for all types of skins. The *best Microdermabrasion* service can repair almost any skin problem area. These [benefits of Microdermabrasion](#) can be achieved in a very short span of time. Microdermabrasion involves the projection of a precise stream of aluminum oxide crystals, directed through a handheld device on the exact portion of your skin. This preciseness ensures that the non targeted areas of your skin do not suffer any damage.

Another *benefit of Microdermabrasion* is that, it will loosen the dead cells of your skin and make it easier for new skin cells to come out to the surface. In order to help the new skin to come up early, the [Microdermabrasion](#) process also includes the removal of dead skin cells by vacuuming them off.

At [www.advancelaserskin.com](http://www.advancelaserskin.com) we are committed to provide the **best Microdermabrasion** treatment service to you. But for optimum results you must know that Microdermabrasion involves a number of sittings for treatment. On an average, each sitting lasts for half an hour. However, if you include upper chest and hands in the treatment package, the time consumed in the sitting will rise up. We ensure that the process is completely noninvasive. While you may experience some redness in the new skin after a treatment, this only lasts an hour or so. Also note that Microdermabrasion may not remove permanent tattoos or major scars due to *acne or scars* or with some other reasons. On a positive note however, one major *benefit of Microdermabrasion* is that it provides instant gratification. The **results of Microdermabrasion** will start becoming visible right after the first sitting.

If you want to know more about the **benefits of Microdermabrasion**, please visit **[www.advancelaserskin.com](http://www.advancelaserskin.com)**.

# KNOW MORE ABOUT MICRODERMABRASION FOR MEN

Looking attractive and young is no longer the prerogative of only women. Most men today don't think twice before deciding to go for a cosmetic tummy tuck or hair transplantation to look attractive and young. Men have recognized the fact unsightly facial features can actually hurt their job prospects by making them appear less competitive than their better looking colleagues. So previously acceptable signs of maturity and wisdom like a bald pate, double chin and sagging cheeks are now getting in the way of men, who wish to climb the ladder of corporate success.

There are a number of factors that result in skin damage like excessive smoking and drinking, sun exposure, working long hours and aging. The easiest and most pocket friendly solution to reverse the signs of aging and other factors is microdermabrasion.

**Microdermabrasion** is a non invasive procedure that helps in removing the wrinkled, blotchy and damaged outer layer of the skin thereby revealing a fresher healthier skin underneath. Microdermabrasion has dramatic effects on a person's appearance and being a quick, non-invasive surgical procedure allows the person to return to his work soon after the treatment.

By logging onto Advanced Laser Clinics ([www.advancedlaserskin.com](http://www.advancedlaserskin.com)) you can the browse through the various treatment options that are available to you. Advanced Laser Clinics has helped countless men discover youth and good looks in sometimes as less as a single sitting. Microdermabrasion for men remains tops the chart for effective to facial blemishes like wrinkles, scars and hyper pigmentation. **Microdermabrasion for men** follows two different procedures depending upon the complication being treated. In the first type of procedure micro crystals exfoliate skins surface after the outer layer is peeled off. In the second procedure a sophisticated sandblaster like device is used to spay fine crystal particles of Corundum, magnesium, sodium bicarbonate and other healing minerals on the skin. Finally in the third procedure a device with an ultra fine diamond tip is used to gently chafe the affected area of the skin.

**Microdermabrasion** facial stimulates the production of healthy cells and removes wrinkles, fine lines and crow's feet. In Advanced Laser Clinics you will get a full consultation and will be sensitized about entire treatment procedure and the results you can expect after the treatment. Moreover you will get a full written service guarantee. So call us today for a free no obligation consultation or visit our official website at [www.advancedlaserskin.com](http://www.advancedlaserskin.com).

# AN ARTICLE ON LASER HAIR REMOVAL

There is this peculiar thing about hair; they look good only on your head and not on any other part of your body. Unwanted or superficial hair is a big nuisance for both men and women, and can give rise to insecurities regarding physical appearance. Till now, most procedures involved with removing unwanted hair was painful, time consuming, and most importantly temporary. Be it waxing, threading, tweezing or shaving, all of it apart from being quite messy and harassing also leaves behind tell-tale nicks, cuts, stubble and ingrown hair. But all that has changed. Today, with the remarkable advances made in laser technology, unwanted hair is being removed safely and affordably. At Advanced Laser Clinics we have developed the most sophisticated and affordable method of [laser hair removal](#) for your benefit.

A laser is a device that produces light of a single wavelength. In dermatology, laser is used to produce pulses of high-energy targeted at desired areas, in this case the melanin pigment contained within the hair shaft. Laser Hair Removal has been extensively researched, tested and proven to be safe and highly effective in permanently reducing unwanted hair. Not only that but because it works on just about any treatment area of the body where smooth skin is desired like underarms, face, neck, legs, shoulders, back, bikini line, it is gaining the confidence of users.

[Laser hair removal](#) is the newest weapon to tackle unwanted facial hair with a guarantee to reduce 50% to 70% facial hair after three treatments. Underarm laser hair removal is a common procedure for patients seeking to remove unwanted under arm hair. Since there is usually a small area to treat, removing underarm hair is one of the fastest procedures in laser therapy, requiring only several minutes of treatment time. Laser removal is also very effective for removing hair from your chest, back and abdomen regions. It also offers a lasting solution for unwanted arm and leg hair. Finally [laser hair removal from the bikini](#) and pubic area helps to stem folliculitis.

There are many benefits of laser hair removal like, permanency, saving time and money, effectiveness against ingrown hair and shorter and painless procedure, make it a viable option for many people to permanently deal with unwanted hair. At our Advanced Laser Clinics you will get the best possible treatment and that too at very attractive prices. For more information please visit our website [www.advancedlaserskin.com](http://www.advancedlaserskin.com).

# KNOW MORE ABOUT HAIR REMOVAL TREATMENT

Millions of men and women around the world with unwanted body hairs are forced to spend a lot of time energy on temporary hair removal methods like- shaving, waxing, applying chemical depilatories, and tweezing. Some opt for electrolysis which is a semi-permanent and time-consuming process. In recent years, laser hair removal has become a viable, effective, permanent alternative method of removing unwanted hair.

In the [laser hair removal](#) process, the laser works by transmitting high energy into the pigment of the hair shaft that is absorbed by the surrounding follicle. Since the laser works on more than one follicle at a time, larger areas like the back, arms or legs are just as easily treatable as smaller areas like the upper lip or bikini line. There are different treatment techniques available for laser hair removal. One such method is [diode laser hair removal process](#). Diode laser offers a permanent and safe solution by eliminating unnecessary or excessive hair.

The Diode laser process is safe and gentle in which the energy emitted is absorbed by the pigment located in hair follicles. The laser pulses for a fraction of a second and vaporizes the pigment, disabling several follicles at a time to eliminate or significantly impede the hair's growth. A chill tip cools the treated skin while the laser energy is delivered to the hair follicles below. Statistics show that 60-95% of targeted hair is permanently gone after 6 months of treatments. This happens because diode laser process essentially burns and cauterizes the problem hair follicles by using a tapered laser beam. Minimal side effects and a relatively pain-free procedure make the diode laser hair removal method very popular amongst users. Widely researched and tested, this highly effectual technique has been known to eliminate unwanted hair permanently from your underarms, face, neck, legs, shoulders, back, bikini line and so on.

One common misconception about the [Diode Laser Hair Removal](#) process is that it is very expensive. On the contrary it is very affordable, something that any budget can accommodate. However a successful course of treatment should be administered over several sessions. If you have decided to go for diode laser hair removal treatment, the first thing you should do is contact Advanced Laser Clinics Advanced Laser Clinics that are conveniently located throughout the Chicago area. To get more information or answers to any question that you might have about diode laser hair removal, [permanent hair removal](#) and laser hair removal treatment please visit [www.advancedlaserskin.com](http://www.advancedlaserskin.com)

# AN ARTICLE ON DIODE LASER HAIR REMOVAL

Nobody likes being called a hirsute. The sight of thick bushy hair underneath the armpits or on legs can cause most women a lot of distress. There are of course a number of men who would give an arm and a leg of to rescue their bodies from unwanted hair. So it's no surprise that removal of unwanted facial and body hair become the most demanded cosmetic enhancements in recent years. This holds true for both svelte legged ladies and also for the hitherto hairy gentleman who spent thousands of dollars a year getting rid of unwanted hair. Before laser hair removal treatment became popular and pocket friendly people were forced to punish their bodies with razors, hot wax, bleaches, and chemical lotions to remove hair. These procedures were not only temporary but did more damage than good. Razor invariably results in nicks and cuts, hot wax and chemicals lotions are disastrous for the complexion (despite of what the manufacturers say). The only hair removal technology in the market that works like a charm is Laser treatment.

**Diode Laser hair removal** uses controlled energy pulses of electricity and light with cooling to reach deep into the roots or base of hair follicles that lie beneath the epidermis or the top layer of the skin. The electricity and light pulses heat hair and pass through it right down to the bottom of the root, killing the follicles and inhibiting re-growth. By logging onto [www.advancedlaserskin.com](http://www.advancedlaserskin.com) you can browse through our Diode laser hair removal option. At Advanced laser Clinics you will be treated by the most advanced FDA approved laser hair removal equipment in the market.

The **LightSheer diode laser hair removal** has been undergone numerous rigorous testing and has been universally hailed as the best laser equipment in the market today. In a recent clinical study involving 92 patients, all experienced temporary hair loss while in 89% of the effects were permanent. The dermatologists at Advanced Laser Clinic use the *Gold Standard* Diode hair removal equipment, which is most sophisticated version currently available in the market. It comes with a patented ChillTip that provides contact cooling to the skin and provides maximum comfort to the skin. The laser device has an excellent coverage rate of 21x12 mm square spot which means that it works faster than any other equipment currently available in the market.

The diode [laser hair removal](#) procedure has also been found very effective in treating unsightly leg veins and benign pigment lesions. So please visit [www.advancedlaserskin.com](http://www.advancedlaserskin.com) for any additional information you may desire on hair removal treatments.
